## Introduction

Smile Care Dental Studio is one of the most advanced dental clinics in the country. It is our eager desire to introduce new benchmarks in dental care services. Smile Craft has always taken the initiative to explore new horizons by introducing new technologies to upgrade dentistry and make it even simpler for the clients. We love to call ourselves "artists" as we combine art with modern instruments to provide pain-free experience. We offer best of the treatment with prime focus on patient's hygiene and safety.

Smile Care Dental Studio offers best consultation by dentists with highest level of expertise backed by well-trained support staff. We offer services for dental problems ranging from common dental diseases to cosmetic dentistry.

We ensure patient visit to be comfortable and pleasant. We likewise offer e-consultation facility for patients to counsel their doctors any time and to take prior appointments.

## Our Mission

Our Aim is to provide multi-speciality solutions for all your dental needs. We want to deliver convenient solutions for our patients. We also want our patients to smile with confidence. Confident smiles encourage and motivate us to achieve more. We want to be the most prominent dentistry studio of India.

## Our Vision

Smile Craft Dental Studio believes in providing each patient with the finest dental care to boost up their confidence. Smile, being the most beautiful way to express, we at Smile Craft shape your smile to create a lasting impression on people.

We believe, "A smile is a curve that sets everything straight." We plan to incorporate this statement into consideration by expanding our dental care services all over India. We plan to deliver beautiful smiles to each and every individual through our dentistry services.

## Our Core Strengths

Smile Craft Dental Studio, apart from providing general dentistry solutions, we believe in amalgamating art with modern dentistry.

We carve smiles to beautify facial features with the help of the latest technology along with our aesthetic sense. Our dental experts love themselves to be called "artists".

Our core strengths are to deliver dental services with utmost precision while maintaining top level hygiene to provide a safe environment for our patients.

We not only deliver regular dental treatments but also offer single day dentistry solutions along with smile design solutions and aesthetic dentistry.

## About Dr. Nirali Patel

Dr. Nirali Patel is an IMPLANTOLOGIST and a certified DIGITAL SMILE DESIGNER. She has earned her Bachelor's degree of dental surgery from Dharamsinh Desai University, Nadiad and holds a post graduate diploma in hospital and healthcare management from Symbiosis, Pune.

Dr. Nirali has attended various education programs in the pursuit to improve her skills in cosmetic dentistry. She has recently completed her post graduate certificate program in Oral Implantology from Manipal College of Dental Sciences (MCODS) and now she's also an Oral Implantology and digital smile design practitioner.

She has obtained her license for dental practice from Gujarat state council of India, which is a part of Dental Council of India. She is also a member of various national and international professional organization like IDA: Indian Dental Association and AACD: American Academy of Cosmetic Dentistry, but also is a certified Digital Smile Designer (DSD, Spain) and hold a membership for the same.

Dr. Patel secured a fellowship in Implantology from International Congress of Implantology (ICOI), USA

# Our Team

The Smile Craft Dental Studio's culture encourages a mindset of ownership in its employees. We love providing opportunities for learning coupled with continuous growth. The doctors at Smile Craft Dental Studio are well qualified and well-trained.

All our team members receive on-going training to ensure they follow best practice and deliver high standards of care. We continually update our skills and techniques so that every visit to our surgery is as relaxed and comfortable as possible.

Specialist)

# Our Services

We provide solutions for all kinds of dental problems from general dentistry to cosmetic dentistry, we cover everything!

# Digital Dental Smile

Digital Smile Design (DSD) is a treatment planning procedure that allows for careful analysis of the patient's facial and dental structures through 2D - 3D videography and digital technology.

With DSD you can design better smiles, treatment plan more effectively as a team, create perceived value and increase case acceptance, perform better treatments in a more efficient way. Currently, the DSD Concept is considered the most modern patient driven designing approach available.

Digital dental gives an impression of how beautiful your smile can get after the treatment. With DSD, one can aesthetically enhance their smiles to add on to their beauty. Get a natural looking bright smile, less crowded-straight teeth, balanced shape and size of teeth with digital smile design.

The DSD (Digital Smile Design) is technically the most advanced system in the field of dentistry.

Digital Smile Design comprises of 5 easy steps

STEP 01

Patient's intake + Photos

STEP 02

Smile Design procedure

STEP 03

Get Digital Smile Preview and Client feedback

STEP 04

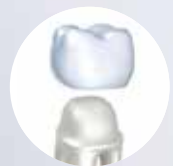

Finalise a design + Confirm the Blueprint

STEP 05

Get a Final Smile Makeover

# SINGLE VISIT DENTISTRY

Our dentists and dental team work hard to stay current on the latest advances in dental technology and techniques. We utilize state-of-the-art dental equipment, including CAD-CAM technology, to help us provide you with the best possible dental care and experience. With CAD-CEM technology, we can create many types of dental restorations in just one visit, including:

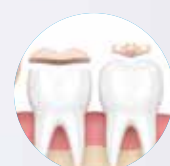

Dental crowns

Dental veneers

Smile Correction

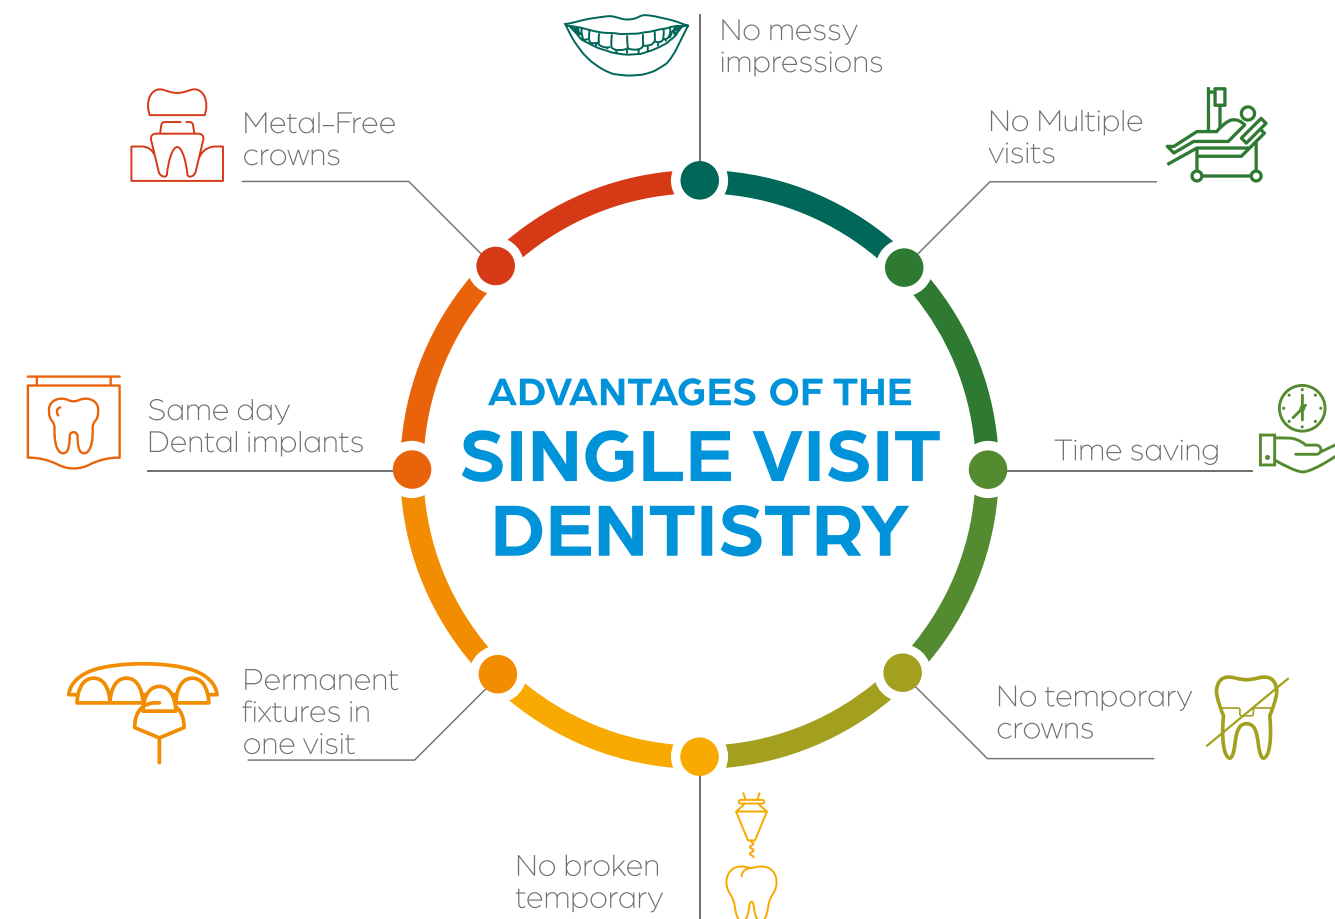

Dental inlays and onlays

3D Guided Implants

Implant Crowns

# IMPLANT DENTISTRY

Dental implant is a surgical component that interfaces with the bone of jaw or skull to support a dental prosthesis such as crown, bridge, denture, and facial prosthesis.

The services that we offer in implant dentistry are:

Single Implants

Multiple Implants

Implant Supported  
Dentures

Full Mouth Implants

Immediate Loading  
Implants

Bone Grafting

Sinus Lifting

# Clear Aligners/ Invisalign

## ORTHODONTIC SOLUTIONS TO BEAUTIFY YOUR SMILE

Everybody wants a great smile, but a lot of us need help to achieve that great smile. More and more people are having success with clear orthodontic devices called aligners. You can enjoy a healthy and aligned smile with the help of Smile Craft Dental Studio's orthodontic care. We offer the latest orthodontic treatments designed for both children and adults, including modern Invisalign® clear aligners. Clear orthodontic aligners are typically used for patients who have mild or aesthetically crowded teeth or have minor spacing issues. Patients who have severe crowding or spacing problems -- or severe underbites, overbites, or crossbites -- may need more complex treatment.

Through our extensive symptomatic test and customized consultation, we will discover a solution that suits your individual needs and your lifestyle.

# CHILDREN DENTISTRY

Pediatric dentists are dedicated to the oral health of children from infancy through the teen years. They have the experience and qualifications to care for a child's teeth, gums, and mouth throughout the various stages of childhood. Children begin to get their baby teeth during the first 6 months of life. By age 6 or 7 years, they start to lose their first set of teeth, which eventually are replaced by secondary, permanent teeth. Without proper dental care, children often get crooked teeth followed by oral problems leading to health issues. Orthodontist's role is to provide evenness to the crooked, uneven teeth of children to eliminate oral problems.

**Pediatric dentists provide comprehensive oral health care that includes the following**

Infant oral health exams, which include risk assessment for caries in mother and child

Preventive dental care with cleaning and fluoride treatments, as well as nutrition and diet recommendations

Habit counselling (for example, pacifier use and thumb sucking)

Early assessment and treatment for straightening teeth and correcting an improper bite (orthodontics)

Repair of tooth cavities or defects

Care for dental injuries (for example, fractured, displaced, or knocked-out teeth)
